

ABOUT ME

Technology professional with 3.5+ years of experience designing and delivering end-to-end AI/ML solutions, advanced analytics systems, and automation-driven applications that streamline operations, improve business performance, and support data-backed decision making. Experienced in building scalable predictive models, NLP-based applications, recommendation systems, and AI-powered automation tools while integrating cloud, reporting, and workflow platforms to enable efficient, reliable, and governance-focused enterprise solutions.

EDUCATION

POST GRADUATION – DATA SCIENCE Great Lakes Institute of Management, Bangalore	2022–2023
BTECH – COMPUTER SCIENCE & ENGINEERING M S Ramaiah University Of Applied Sciences, Bangalore	2017–2021
PRE-UNIVERSITY Independent PU College, Hosapete	2015–2017
GRADE 10 Kendriya Vidyalaya, TB Dam Hosapete	2015

SKILLS

- **Database Languages:** SQL, Azure SQL Database,Vector Databases
- **Programming Languages:** Python, C, C++
- **Data Science – AI/ML:** Machine Learning, Statistical Methods, NLP, Deep Learning, Artificial Intelligence, Generative AI, AWS, Microsoft Azure ML, MLOps, RAG-LLMs, LLM Fine-tuning, Prompt Engineering, Hugging Face Transformers, LangChain
- **AI Deployment:** FastAPI, REST API, Azure App Service, CI/CD,Azure OpenAI, Azure AI Search
- **Data Analysis:** EDA, ETL, ML Frameworks & Libraries, Process Data Mining
- **Data Visualization:** Tableau, Power BI, MS Excel

WORK EXPERIENCE

Senior Software Engineer – AI/ML LTIMindtree, Bangalore	JAN 2026 – PRESENT
• Developing and integrating AI-driven media automation solutions, enabling intelligent content processing, metadata enrichment, localization, compliance, and monetization workflows. • Worked on BlueVerse MediaCube, an AI-native media transformation platform that brings together intelligent AI solutions to automate and optimize content production, compliance, localization, discoverability, and monetization workflows. • AI Solutions: 1. Discover.AI : AI-powered conversational search and recommendation engine that enables natural language content discovery, personalized recommendations, and semantic search across OTT and media platforms. 2. VideoTag.AI : AI-driven metadata tagging and scene-level content indexing solution that uses computer vision and NLP to automate media tagging, improve content discoverability, and enhance monetization workflows. • Skills Utilised: AI ML, NLP, RAG-LLM, Multimodal AI, Computer Vision, GenAI, Semantic Search, Conversational AI, Metadata Tagging and Indexing, Vector Search and Embeddings, AI Model Integration & Deployment, Media Workflow Automation	
AI ML Engineer Aventra Group Pvt Tld, Bangalore	JULY 2023 – NOV 2025
• Design, Develop and Deploy machine learning models to solve complex business problems and enhance data-driven decision-making. • Worked on Client-based projects building Machine Learning models on Time Series Forecasting models, NLP, AI-Driven – Performing End-to-End Integrations and deployments in Azure as per the dataset types	

- Projects:
 1. **Product Seasonality (Time Series Forecasting):** Designed and developed a time series forecasting and recommendation platform to analyze product seasonality trends across multiple regions and ports.
 2. **Charter Party Agreement in Shipping Field (NLP):** Developed a CPA Management System with automated tracking, AI-driven clause validation, and advanced search capabilities to improve contract governance, streamline compliance review, and enhance document retrieval efficiency
 3. **AI-Triage (Classification Model - NLP):** Developed an automated Salesforce Case Triaging System to streamline email-based case management by classifying, prioritizing, and routing incoming requests to the appropriate departmental response teams using AI-driven processing and workflow automation.
 4. **DocumentChat (RAG-LLM):** Developed an AI-powered DocumentChat platform using RAG architecture, Azure AI Search, and OpenAI LLMs to enable intelligent document retrieval and interactive conversational query responses across enterprise knowledge sources
- **Skills Utilized:** Data Science, AI/ML, NLP, Microsoft Azure Machine Learning, Python (TensorFlow, PyTorch, Scikit-learn), MLOps, RAG-LL

Data Analyst

SEPT 2021 – JUNE 2022

Tech Mahindra, Bangalore

- Worked on ETL Celonis Tool, Performing Data connections, Data Extractions, Transformations and Process Data Model Loading at Backend, along with Creating Dashboards with Complex KPI's at Frontend.
- **Skills Utilized:** ETL Tool, Knowledge Model, Action Flow, SQL, Python, Microsoft Excel, Machine Learning
- **Achievements:** Certificate on Robotics Process Automation, Business Analysis Fundamentals Training provided by Tech Mahindra

PERSONAL PROJECTS

Project 1: AI vs Real Image Detection using Deep Learning

- **Objective:** Developed an AI-powered image classification system to accurately distinguish AI-generated images from real photographs using deep learning and explainable AI techniques (Grad-CAM).
- **Key Highlights:**
 1. Designed a weighted ensemble model using EfficientNet-B0 and ResNet18 for robust image classification.
 2. Implemented image preprocessing, model evaluation, and Grad-CAM-based Explainable AI for prediction interpretability.
 3. Built a Streamlit application for real-time image classification with confidence scores and visual explanations.
- **Tools Used:** PyTorch, Computer Vision, Deep Learning, Ensemble Learning, OpenCV, Image Classification.

Project 2: Airline Customer Satisfaction – ML Project

- **Objective:** To predict whether a future customer would be satisfied with their service given the details of the other parameters values. Built a classification model to predict the satisfaction of the customers on the given features.
- **Tools Used:** Python, EDA, Machine Learning Models

OTHER ACHIEVEMENTS

- **College Tech Fest:** Achieved a Certificate and 1st Prize issued by Ramaiah University of Applied Sciences on the Event named "SHE HACKS"
- **Prototype Mentoring:** A Hackathon conducted by Inqui-Lab Foundation, which is a problem-solving program for children to ideate the solutions and communicate with great prototyping skills

HACKATHONS/OTHER CERTIFICATIONS

Hackathon: Spaceship Titanic

Kaggle Hackathon Competition

- **Objective:** To help rescue crews and retrieve the lost passengers, predict which passengers were transported by the anomaly using records recovered from the spaceship's damaged computer system.
- **Tools Used:** Python, EDA, Machine Learning Models

Certifications:

1. Achieved a Course Completion Certificate in AWS FUNDAMENTALS offered by Amazon Web Services.
2. Completed a Project on MACHINE LEARNING FEATURE SELECTION in Python offered by Coursera.
3. Completed a Project on Creating Python Application using MySQL offered by Coursera
